

VK10

Vortex LED Fx

The VK10 Vortex is the LED effect that offers wash and beam effects including amazing Kaleidoscope effects. It's Led engine of 19x15w RGBW 4in1 chips creates a really bright beam that can zoom in and out whilst rotating the lens and in air beams and the big bright optics create a stunning visual 'Eye Candy' display. Full pixel mapping is also standard - allowing the addressing of each Led.

- ◆ Beam, Wash & Vortex Fx
