

# VKST8be

## Led Strobe / Panel

The new VKST8be is a new concept and much more than just a Strobe, but a LED panel light which can be assembled in blocks to form much larger displays and walls of effect lighting and even washes. Available in RGB and traditional White versions it is equally at home as a Strobe Blinder or an Eye Candy panel. Each unit has 8 sections for pattern creating, built in programs and a 'quick lock' assembly system for building larger modules into walls of effect. Truly an amazing product for functions, festival, theatre and concert use.

- ◆ 1056pcs of White or RGB Led
